CAREER SUMMARY

Data Scientist and Analytics Professional with experience delivering **machine learning, predictive analytics, and business intelligence solutions** that transform complex data into actionable insights. Proven success developing scalable analytical solutions, optimizing business performance, and enabling data-driven decision-making across cross-functional teams.

PROFESSIONAL EXPERIENCE

SPACEBAR TECH SOLUTIONS LLC | Data Analyst | Remote, WY

Jul 2026 – Present

- Develop and deliver scalable analytics solutions using Python, SQL, Power BI, and Excel, supporting **20+ executive KPIs** and enabling data-driven strategic decision-making.
- Design and automate **executive KPI dashboards, reporting frameworks, and data pipelines**, improving reporting efficiency, data accuracy, and operational visibility.
- Partner with cross-functional stakeholders to perform **EDA, trend analysis, root cause analysis, and KPI monitoring**, driving process optimization and data-informed business decisions.

KGS TECHNOLOGIES | Data Scientist | Remote, GA

Aug 2025 – Jun 2026

- Designed, developed, and deployed machine learning, forecasting, and predictive analytics solutions using Python, SQL, and Scikit-learn to improve business forecasting and operational decision-making.
- Designed and analyzed **A/B tests, hypothesis tests, and statistical experiments** while engineering scalable **ETL pipelines** that reduced manual preprocessing by **25%**.
- Optimized model performance through **feature engineering, cross-validation, hyperparameter tuning, and model evaluation**, collaborating with engineering teams to deploy production-ready solutions.

UNIVERSITY OF NORTH TEXAS | Graduate Research Assistant | Denton, TX

May 2024 – Dec 2024

- Investigated, reproduced, and benchmarked RAG, RAFT, and fine-tuning methodologies to evaluate domain-specific LLM adaptation using state-of-the-art research.
- Reviewed and synthesized findings from 10+ research publications to identify domain adaptation strategies and emerging retrieval-augmented techniques.
- Collaborated with faculty to improve LLM performance, reproducibility, and evaluation methodologies through comparative experimental analysis.

BIT INFOTECH | Business Strategy & Analytics Consultant | Vadodara, GJ

Mar 2020 – Jun 2023

- Promoted from Data Analyst to Business Strategy & Analytics Consultant based on strong analytical performance, delivering business intelligence and predictive analytics solutions for enterprise clients including John Deere.
- Analyzed **100K+ multi-source datasets** using **Python, SQL, ETL pipelines, and statistical analysis**, improving operational efficiency by **15%** through data-driven recommendations.
- Developed **predictive models, NLP solutions, and executive Power BI/Tableau dashboards**, translating complex data into actionable insights for business strategy and performance optimization.

VOLANSYS TECHNOLOGIES (An ACL Digital Company) | Trainee Engineer | Ahmedabad, GJ

Aug 2021 – Dec 2021

- Developed scalable full-stack applications using **Python, Flask, ReactJS, JavaScript, SQL, HTML, and CSS**, delivering reliable backend services and responsive user interfaces.
- Designed **REST APIs**, optimized SQL queries, and streamlined backend workflows to improve application performance and data accessibility.
- Built **10+ production-style web applications** while collaborating with cross-functional teams to enhance system reliability and application scalability.

EDUCATION

University of North Texas | Denton, TX

May 2025

Master of Science in Data Science

Gujarat Technological University | Gujarat, India

Apr 2022

Bachelor of Engineering in Information Technology

PROJECTS

- MedEval – LLM-Based Clinical Summarization Evaluation:** Led a 4-member interdisciplinary capstone team to architect, implement, and benchmark an end-to-end LLM evaluation framework using **Mistral 7B, LLaMA-2, G-Eval, ROUGE, BLEU, and the MIMIC-III dataset** for clinical text summarization.
- Healthcare Behavioral Analytics:** Built predictive machine learning models and **Tableau** dashboards using **Python and SQL** to analyze **2,000+ healthcare records** and identify obesity risk factors.
- Predictive Analysis of Financial Market Trends:** Developed **time-series forecasting models** and interactive **Tableau** dashboards using **Python and SQL** to analyze market trends and support investment decision-making.

SKILLS

- Programming:** Python, SQL, R, Java
- Data Analytics & BI:** Exploratory Data Analysis (EDA), Statistical Analysis, A/B Testing, Hypothesis Testing, Data Visualization, Power BI, Tableau, Excel
- Machine Learning & AI:** Scikit-learn, TensorFlow, Regression, Classification, Clustering, Time Series Forecasting, Feature Engineering, NLP, Large Language Models (LLMs), RAG, Hugging Face
- Data Engineering & Cloud:** ETL Pipelines, Data Modeling, Data Warehousing, BigQuery, AWS
- Tools:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Accenture North America Data Analytics & Visualization Job Simulation (Forage)
