

DRASHTI MITESHKUMAR MEHTA

Denton, TX | 940-843-9280 | mdrashti143@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Work Authorization: F-1 OPT (STEM Eligible) | Open to Relocation

CAREER SUMMARY

Data Scientist with 3+ years of experience in machine learning, LLM pipelines, and data analytics. Expertise in experimentation, predictive modeling, and statistical analysis, delivering scalable solutions that improve model performance and drive data-informed business decisions.

EDUCATION

University of North Texas Denton, TX	May 2025
Master of Science - Data Science	
Gujarat Technological University Gujarat, India	May 2022
Bachelor of Engineering – Information Technology	

PROFESSIONAL EXPERIENCE

KGS Technology Group, Data Scientist Alpharetta, GA (Remote)	Aug 2025 - Present
- Designed and deployed production-grade predictive models using Python and SQL, enabling data-driven decision-making and improving business strategy across cross-functional teams. - Built scalable data pipelines for structured and unstructured data, improving data processing efficiency and ensuring high data quality for downstream analytics. - Developed KPI dashboards (Tableau, Power BI) and delivered actionable insights to support strategic business decisions and performance optimization.	

University of North Texas, Graduate Research Assistant Denton, TX	Aug 2024 - Dec 2024
- Evaluated RAFT vs RAG vs traditional fine-tuning methods for domain-specific LLM adaptation, improving model performance and benchmarking reliability. - Built and optimized LLM pipelines for clinical summarization, improving evaluation accuracy and enabling scalable experimentation across multiple model configurations. - Documented reproducible research workflows and results, strengthening data governance and experimental rigor	

AMI Drashti, Business Strategy & Analytics Consultant Vadodara, India	Oct 2021 - Jun 2023
- Founded and led a data-driven analytics practice, delivering KPI dashboards and forecasting models that improved revenue visibility by 25%+. - Analyzed large-scale sales and operational datasets (100K+ records) to identify key drivers, increasing retention and operational efficiency by 15–20%. - Standardized reporting frameworks and led cross-functional initiatives across 50+ stakeholders, reducing reporting errors by 30% and enabling data-driven decision-making.	

Volansys (An ACL Digital Company), Full Stack Developer (Data Team) Ahmedabad, India	Aug 2021 - Dec 2021
- Developed and deployed full-stack applications using Python, Flask, and ReactJS that improved workflow efficiency and enabled faster data insights for production teams. - Designed backend APIs and optimized data processing pipelines, improving system performance and scalability for high-volume data operations. - Conducted data analysis and debugging, reducing system errors and enhancing overall application reliability and user experience	

BIT Infotech, Data Analyst Ahmedabad, India	March 2020 - March 2021
- Analyzed structured and unstructured datasets using Python (Pandas, NumPy) to generate actionable insights and support business decisions. - Built and evaluated machine learning and NLP models, improving predictive accuracy through data preprocessing and feature engineering. - Developed dashboards and reports to communicate insights, enabling stakeholders to make data-driven decisions.	

SKILLS

- TECHNICAL SKILLS**
 - Languages: Python, SQL, R, Java
 - Machine Learning & AI: Scikit-learn, TensorFlow, NLP, LLMs (RAG, RAFT, Hugging Face)
 - Data Analytics & Business Intelligence: Pandas, NumPy, A/B Testing, Hypothesis Testing, Forecasting, Statistical Modeling, Data Modeling, Tableau, Power BI
 - Cloud & Tools: AWS, BigQuery, Git, Jupyter Notebook, VS Code, Colab
- BUSINESS SKILLS:** Stakeholder Collaboration, Cross-Functional Communication, Team Leadership, KPI Development, Data-Driven Decision Making, Process Optimization, Root Cause Analysis

PROJECTS

- Med-Eval: LLM-Based Clinical Summarization Evaluation System** – Built GPT-based pipeline (Mistral-7B, LLaMA-2) using RAG, CoT, and G-Eval; benchmarked performance with ROUGE/BLEU and A/B testing.
- Lifestyle Determinants of Obesity** – Analyzed 2,000+ records using Python and Tableau to identify key lifestyle and demographic drivers of obesity.
- Predictive Analysis of Financial Market Trends** – Developed time-series forecasting models and KPI dashboards to simulate and monitor stock performance at scale.

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Accenture North America Data Analytics and Visualization Job Simulation - Forage
